MANAGEMENT DISCUSSION AND ANALYSIS OR PLAN OF OPERATIONS

As of March 31, 2024

Local inflation started to trend upward averaging to 3.3% YoY for the first quarter of 2024. The recent uptick in prices was mainly driven by surge in rice prices due to tight supply, high world prices and impact of El Niño. Consequently, the BSP held its policy rate steady at 6.5% during its Monetary Board meeting held in February. Nonetheless, they reiterated that upside risks to inflation remained and any policy actions moving forward would remain data dependent. Towards quarter-end, markets saw local yields rose given supply at the belly to long-end of the curve and higher inflation expectations. Meanwhile, the BTr announced its borrowing schedule for the second quarter of 2024, offering 3-, 7-, 10-, 15-, and 20- year FXTNs. As of March 27, 2024, PH BVAL rates were higher, with increase seen mostly on the short-end and long-end of the curve. The 3-month and 10-year papers rose to 5.73% and 6.23%, respectively.

Philippine economic grew by 5.6% in the last quarter of 2023, lower than the 6.0% year-on-year growth posted in the previous quarter. The capital formation surged by 11.2% year-on-year following previous quarter's contraction while the household consumption expanded by 5.3% year-on-year. The slowdown from previous quarters brought the full year 2023 growth to 5.6%.

Top Five Key Performance Indicators as of 31 March 2024

Performance vis-à-vis the Benchmark – ALFM Peso Bond Fund is an actively managed bond fund whose objective is long-term capital appreciation through investments in a diversified portfolio composed of high-grade fixed-income investment instruments. The Fund's aim is to outperform its benchmark. The Fund's return on investment (ROI) for the 1Q 2024 was 0.69% net of fees and taxes, underperforming its benchmark by 28 basis points. Stability of return is prioritized to shelter the investors from market volatility.

Market Share in the Industry – The Fund is expected to maintain its strong presence in the mutual fund industry. The Peso Bond Mutual Fund industry has two major players in terms of Net Asset Value: ALFM Peso Bond Fund and Sun Life Prosperity Bond Fund. As of end-March 2024, ALFM Peso Bond Fund maintained its market dominance having majority (72.8%) of market share.

NAV Growth vis-à-vis Industry Growth – The Fund's average daily NAV for the first quarter of 2024 was at PHP 36.33 Billion. The peso bond fund industry declined by 1.30% in terms of total net asset value or by PHP 654.25 Million. ALFM Peso's NAV also contracted by PHP 520.20 Million or -1.42% year-to-date, but still managed to maintain its pole position in the mutual fund industry.

Portfolio Quality – The Fund's portfolio should, at all times, adhere to the investment parameters as indicated in the Fund's prospectus. The Fund continued to remain well diversified in 1Q 2024 with 42.4% in government securities, 54.4% in corporate bonds and notes, and 3.22% in cash and cash equivalents. We continue to remain slightly underweight given upside risks to inflation in the near term.

Performance vis-a-vis Competition - The Fund's performance is usually compared against the performance of other players in the bond fund segment. As of end-March 2024, ALFM Peso Bond Fund ranked third out of ten mutual bond funds in terms of year-to-date returns.

Net Asset Value Per Share (“NAVPS”) for the 1st Quarter of 2024:

QUARTER	DATE	NAVPS	
1st	02/01/23	390.53	LOW
	31/03/24	393.34	HIGH

AS OF DECEMBER 31, 2023

In 2023, domestic fixed income returned positively with the local currency bond index gaining 8.24%. This was boosted by falling bond yields after local inflation eased from the 8.7% peak in January. While we saw a rebound in the third quarter, inflation decelerated to 3.9% in December amid cooling prices of food and utilities. This settled within the Bangko Sentral ng Pilipinas' (BSP) target range of 2-4% for the first time since March 2022. Following a 100-bp hike made over the course of the year, the continued decline in inflation allowed the BSP to keep the policy rate steady at 6.5% during the December monetary policy meeting.

Moving forward, inflation is expected to continue trending lower with the BSP forecasting inflation to average 3.7% in 2024 from 6.0% in 2023. Moreover, the US Federal Reserve signaled that it could start easing monetary policy in 2024. These tailwinds may enable the BSP to gradually cut rates in the second half. However, we remain watchful of upside risks to inflation such as the impact of El Niño phenomenon on agricultural product prices including rice, global oil price volatility, transport fare hikes, power rate upward adjustments, and above-average wage increases. In line with this, BSP Governor Remolona signaled that the BSP will likely keep the policy rate tight until inflation firmly falls within target.

Given the favorable inflation outlook and attractive bond yields compared to historical averages, we still see opportunity to invest in fixed income. We believe investors are well positioned to augment their portfolio by adding duration to their fixed income holdings. This provides an opportunity to lock in the elevated yields and capitalize on the potential marked-to-market gains once the central bank cut rates. Despite the potential short-term risks to the inflation outlook, we see inflation moderating over the medium term as global economic growth slows and as the delayed impact of tight monetary policy takes effect.

For 2024, expect ALFM Peso's priority to give investors a consistent, stable return that is true to its investment objective. The Fund will take advantage of the high interest rate environment by locking in yields at current levels. The fund manager is looking to gradually add duration with the outlook of eventual normalization of yields lower when inflation moves back to target and the BSP starts cutting policy rates. Long-term investors will get the full reward of investing and shareholders should be prepared to withstand short term volatility.

AS OF DECEMBER 31, 2022

The Philippine economy posted a robust 7.6% year-on-year growth in 2022 as post-pandemic reopening activities continued to drive consumer and business spending. The figure was higher than the government's target range of 6.5%-7.5% for the year. On the other hand, local inflation continued to accelerate, clocking in as high as 8.1% year-on-year in December as supply-side pressures persisted. Elevated prices, along with various global monetary policy tightening actions, drove the Bangko Sentral ng Pilipinas (BSP) to announce an off-cycle 75-basis point hike mid-year. In 2022, the BSP raised rates by a total of 350 basis points.

The prospect of a prolonged high-inflation environment drove yields higher across the curve in 2022, particularly on the short-end. Year-on-year, the yield on the 1-year rose by about 355 basis points to 5.21%, the 5-year yield rose by about 227 basis points to 6.47%, while the yields on 6-10-year securities rose by about 208 basis points on average. 2022 was thus another challenging year for fixed income markets.

For 2023, we expect Philippine economic growth to moderate slightly as prolonged elevated price levels limit spending. The BSP will likely consider economic data, particularly inflation, and will continue to monitor for signs of over-heating. They have continuously reiterated that they are prepared to step in and utilize their monetary policy tools as needed.

Thus, for 2023 ALFM Peso Bond Fund will be positioned as slightly underweight versus neutral in terms of duration due to expectations of higher inflation. Since ALFM Peso Bond Fund is positioned as a medium-term bond fund, shareholders will get the full reward of investing for the long term and should be prepared to withstand some expected volatility.
